Customer Shopping Behavior Analysis

1. Project Overview

This project analyzes Male customer shopping behavior using transactional data from 4000 purchases across various product categories. The aim is to uncover insights into spending patterns, customer segments, product preferences, and subscription behavior to guide strategic business decisions.

2. Dataset Summary

- Rows: 4000

- Columns: 18

- Key Features:
  • Customer demographics (Age, Gender, Location, Subscription Status)
  • Purchase details (Item Purchased, Category, Purchase Amount, Season, Size, Color)
  • Shopping behavior (Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type)

- Missing Data: 37 values in Review Rating column

2 Dataset Collection

The data was sourced from Kaggle and was loaded into python for EDA

```
[1]: import pandas as pd
     import numpy as np
```

```
[2]: df=pd.read_csv('shopping_trends .csv')
```

```
[3]: df
```

[3]:

	Customer ID	Age	Gender	Item Purchased	Category	Purchase Amount (USD)	Location	Size	Color	Season	Review Rating	Subscription Status	Payment Method	Shipping Type	Discount Applied	Promo Code Used
0	1	55	Male	Blouse	Clothing	53	Kentucky	L	Gray	Winter	3.1	Yes	Credit Card	Express	Yes	Yes
1	2	19	Male	Sweater	Clothing	64	Maine	L	Maroon	Winter	3.1	Yes	Bank Transfer	Express	Yes	Yes
2	3	50	Male	Jeans	Clothing	73	Massachusetts	S	Maroon	Spring	3.1	Yes	Cash	Free Shipping	Yes	Yes
3	4	21	Male	Sandals	Footwear	90	Rhode Island	M	Maroon	Spring	3.5	Yes	PayPal	Next Day Air	Yes	Yes
4	5	45	Male	Blouse	Clothing	49	Oregon	M	Turquoise	Spring	2.7	Yes	Cash	Free Shipping	Yes	Yes

3. Data Cleaning & Preparation

• *Missing Data Handling:*

Checked for data types, null values and imputed missing values in the Review Rating column using the median rating of each product category.

```
df.info()
```

```
<class 'pandas.core.frame.DataFrame'>
RangeIndex: 3900 entries, 0 to 3899
Data columns (total 19 columns):
 #   Column                    Non-Null Count  Dtype

4. Feature creation

• Created age group column by binning customer ages.

• Created purchase_frequency_days column from purchase data.

5. Data Consistency

• Data Consistency Check: Verified if discount_applied and promo_code_used were redundant; dropped promo_code_used.
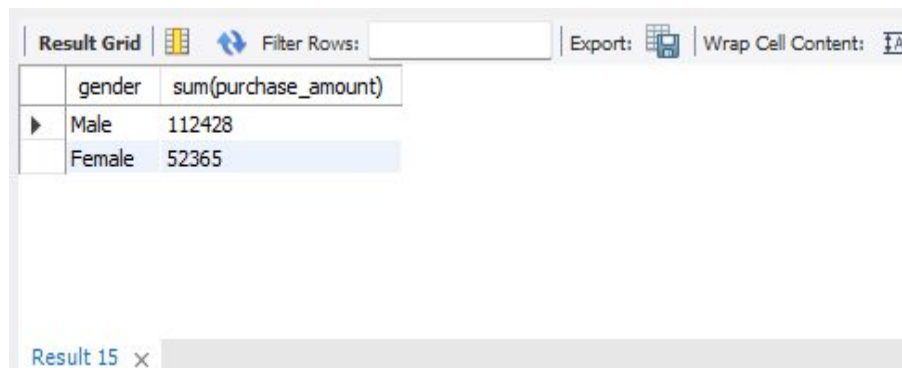

6.Data Export

Saving data into a file format (Excel / CSV) and exported to MySQL

7. Data Analysis using SQL

Structured analysis was performed in MySQL to answer key business questions such as:

• Revenue by Gender – Compared total revenue generated by male vs. female customers.

	gender	sum(purchase_amount)
▶	Male	112428
	Female	52365

Result 15 ✕

• Top 5 Products with the highest revenue by comparing total revenue generated across all products.

item_purchased	average_rating
Gloves	3.89
Sandals	3.85
Boots	3.82
Hat	3.81
Shorts	3.80

• Average price of the mode of shipping used

shipping_type	round(avg(purchase_amount),2)
Express	61.34
Standard	58.21

• Comparing average spend and total revenue between Subscribers and non-Subscribers to find out if more customers subscribe

subscription_status	total_customers	avg_spend	total_revenue
Yes	759	59.12	44869
No	2010	59.66	119924

• Item which have the highest number of purchases with discounts applied

item_purchased	discount_rate
Sneakers	51.40
Jewelry	50.00
Hat	49.57
Sweater	49.56
Coat	47.97

- Top 3 most purchased products within each category

category	item_purchased	purchase_count
Accessories	Sunglasses	121
Accessories	Hat	117
Accessories	Scarf	116
Clothing	Pants	127
Clothing	Shirt	126
Clothing	Dress	118
Footwear	Sandals	112

- Buyers who make more than five purchases that are more likely to subscribe

subscription_status	total_customers
Yes	689
No	1787

- Revenue Contribution by Group

age_group	total_revenue
young adult	42342
middle-aged	42058
adults	40329
Senior	40064

8. Data visualization with Power BI

This Power BI report analyzes customer behavior to identify key purchasing patterns, revenue drivers, and customer segments.

The dashboard shows that Clothing and Accessories generate the highest sales and revenue, with Young Adults contributing the most to overall sales. Most customers are non-subscribers, highlighting an opportunity to improve subscription adoption and customer retention.

Overall, the report provides actionable insights to support data-driven marketing, sales optimization, and customer engagement strategies.
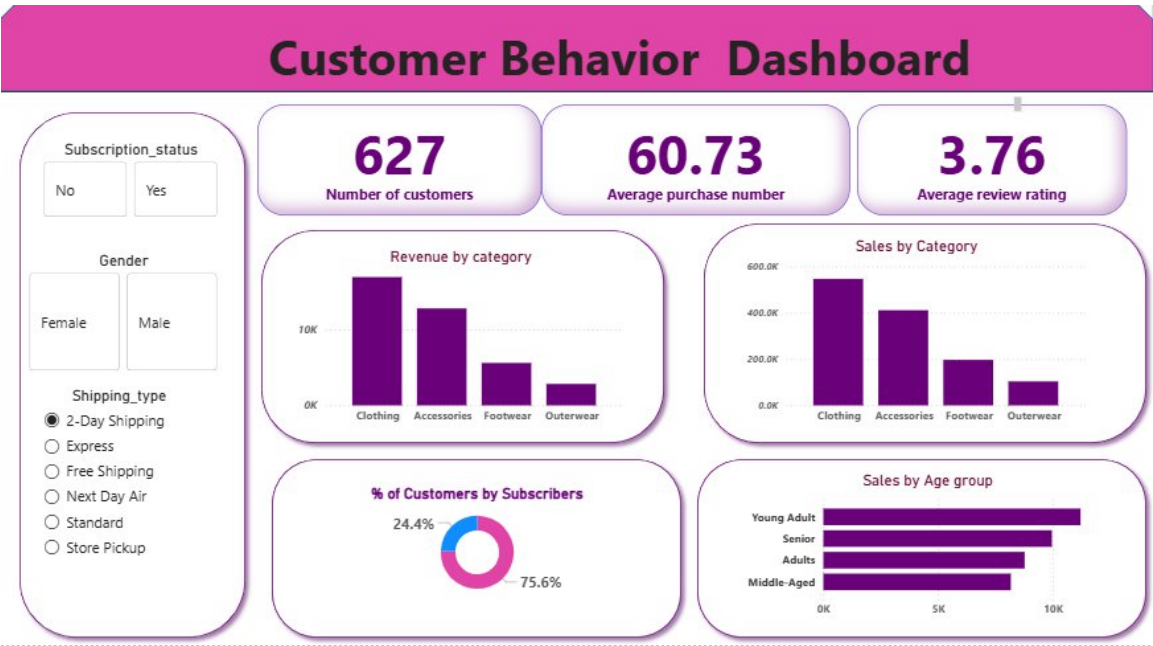

9. Business Recommendations

• Boost Subscriptions – Promote exclusive benefits for subscribers.

• Customer Loyalty Programs – Reward repeat buyers to move them into the 'Loyal' segment.

• Review Discount Policy – Balance sales boosts with margin control.

• Product Positioning – Highlight top-rated and best-selling products in campaigns.

• Targeted Marketing – Focus efforts on high-revenue age groups and express shipping users.
